PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience as an IT Apprentice, working in technical support, infrastructure, and hardware/software maintenance. Familiar with Windows and Linux operating systems, basic networking concepts (TCP/IP, DNS, DHCP, VPN), and a solid foundation in programming. Proactive, self-taught, organized, and collaborative when supporting internal users, with proven results in IT asset management. Fully available for 100% remote (home office) work.
